DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I – “An Elevator Apparatus” – Fig. 1

Species II – “An Elevator Apparatus comprising car suspension sheaves” – Figs. 3-4

Species III – “An Elevator Apparatus wherein the counterweight is disposed in front in a depth direction” – Fig. 5

Species IV – “An Elevator Apparatus comprising an angle adjusting pulley” – Figs. 6-7

Species V – “An Elevator Apparatus wherein drive machines are disposed side by side” – Figs. 8-9

Species VI – “An Elevator Apparatus wherein first and second main ropes cross” – Figs. 10-11

Species VII – “An Elevator Apparatus wherein first and second suspension sheaves are aligned to pass through center of gravity of the elevator car” – Figs. 12-13

Species VIII – “An Elevator Apparatus comprising multiple deflection pulleys and a single counterweight” – Figs. 14-15

Species IX – “An Elevator Apparatus comprising endless ropes and suspension sheaves mounted to lower portion of the car” – Fig. 16-17

Species X – “An Elevator Apparatus comprising one drive machine and one deflection pulley” – Figs. 18-19

Species XI – “An Elevator Apparatus wherein the counterweight has a reduced width dimension” – Fig. 20

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I corresponding to claims 1-3, 12

Species VIII corresponding to claim 10

Species VII corresponding to claim 11

Species II corresponding to claim 13

Species VI corresponding to claim 14

Species IV corresponding to claim 15

The following claim(s) are generic: claim 16.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The above referenced species all contain varying special technical features ranging from deflection pulleys, suspension sheaves, angle adjusting pulleys, to single or multiple counterweights or drive machines.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 3654

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
